filed in response to a Quayle action; or	ant amendment is a non-final amendment or an amendment amendment is a preliminary amendment or supplemental			
/Boris Pesin/ Examiner, Art Unit 2174				

Continuation of 5 Other: MPEP Section 714.02 States, "In order to be entitled to reconsideration or further examination, the applicant or patent owner must reply to the Office action. The reply by the applicant or patent owner must be reduced to a writing which distinctly and specifically points out the supposed errors in the examiner's action and must reply to every ground of objection and rejection in the prior Office action. The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. If the reply is with respect to an application, a request may be made that objections or requirements as to form not necessary to further consideration of the claims be held in abeyance until allowable subject matter is indicated. The applicant's or patent owner's reply must appear throughout to be a bona fide attempt to advance the application or the reexamination proceeding to final action. A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section."

The Applicant has not pointed out the specific distinctions believed to render the claims patentable over the applied references. The Applicant has simply made a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references. .
